

diy photoprops

INSTRUCTIONS

How to Create:

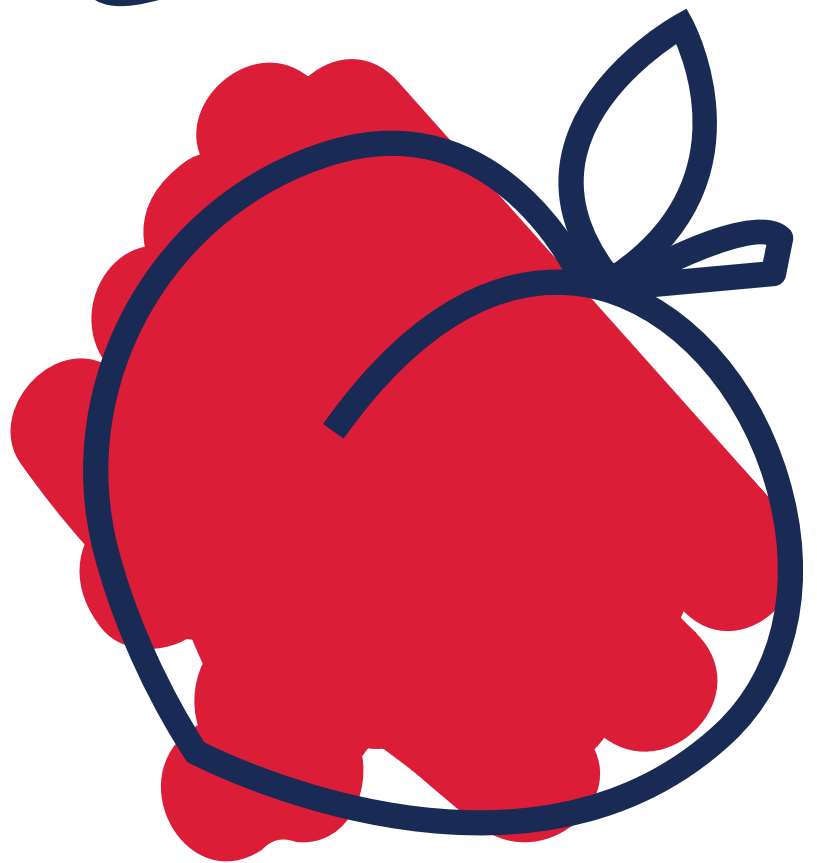

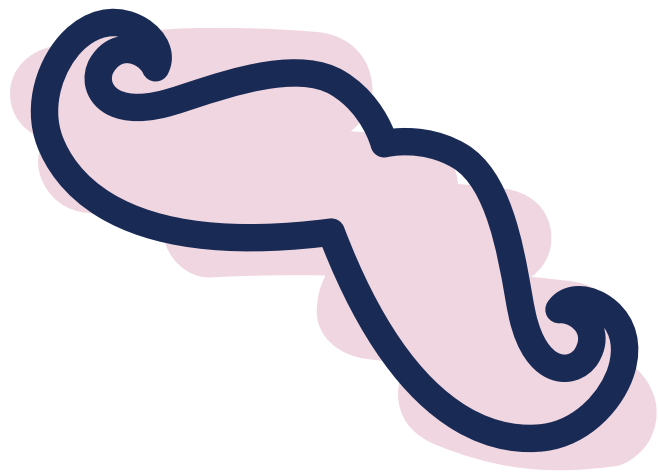

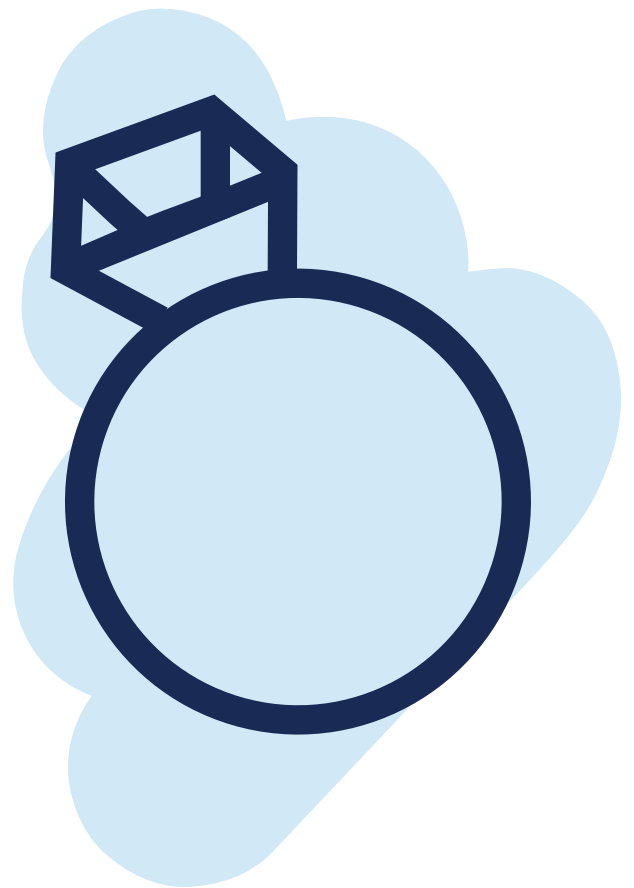

Simply print off the photoprops either on thick cardstock at home or send off to your local printer. After printing, cut out each prop and attach to dowel rods for more mobility or just hold onto them for your close ups. Use them all or just a few, they're here for you!

Ideas:

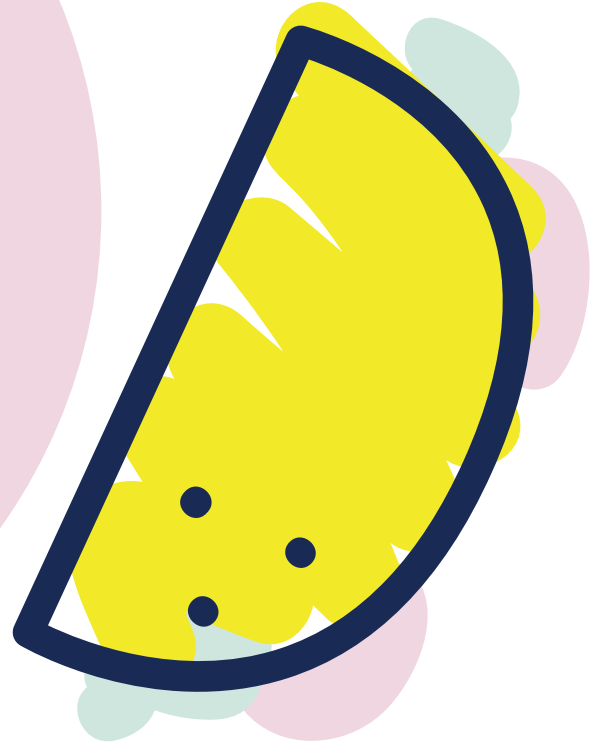

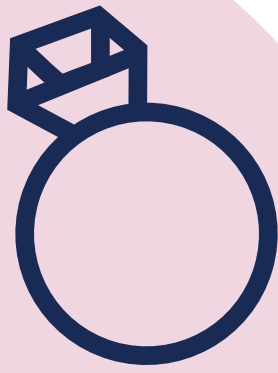

Jazz 'em up! Use glitter or rhinestones if you're really about that crafting life to add some pizzazz to the design.

this
bitch
is gettin'
hitched!

oh veil
yeah.

pssh-
bach,
please.
